COMPANY PROFILE

www.friendsindustries.com.pk

COMPANY BRIEF

The company is renowned as manufacturer and supplier of best plastic items that are widely used for packing material in various industries, sectors i.e. pharmaceutical, healthcare, beauty aids, chemical, autos, foods & drink etc. Through the modern technological capabilities and with the assistance of our expert team, we can easily and efficiently offer customized products to various industries in various sizes and designs as per the client choice. Our products are known for the features like design, finish, quality, reliability And long service. We always keep in mind that "a benefit to customers is a benefit to ourselves", which has helped us in carving a niche for ourselves.

CEO MESSAGE

Assalam o Alaikum

This is my pleasure to introduce Bridge & Buyer, established in 1995 and proud to say that our company is one of the most leading independent plastic packing material company among other companies. The success and growth of any company is only as good as the people behind it. Today, company's staff meets the varying needs of our individual clients by using in-depth, practical experience in plastic packing material and consulting. I look forward to working with your esteemed organization always for the mutual benefit. I want to assure you the quality service and better co-operation for in the future. Warm regards,

Adil Shuja Khan
Chief Executive

OUR VISION

We believe that we are on the face of the earth to make great products and that's not changing. We are constantly focusing on innovating. We believe in the simple not the complex. We believe that we need to own and control the primary technologies behind the products that we make, and participate only in markets where we can make a significant contribution. We believe in saying no to thousands of projects, so that we can really focus on the few that are truly important and meaningful to us. We believe in deep collaboration and cross-pollination of our groups, which allow us to innovate in a way that others cannot. And frankly, we don't settle for anything less than excellence in every group in the company, and we have the self-honesty to admit when we're wrong and the courage to change. And I think regardless of who is in what job those values are so embedded in this company that we will do extremely well.

OUR MISSION

Our main Motto is to develop the most advanced plastic packaging materials for our valuable customers. We have long and Valuable industry experience. Which helped us to produce consistent quality packs and offer timely delivery services. We also strive to gratify the customers with the super quality packaging solution at affordable prices. Our company keeps ourselves update with advanced technology to offer thebest available solution.

OUR SERVICES

Our services are provided under the superior guidance of our able professionals to achieve higher levels of customer satisfaction in the field of the plastic packaging industry. Our services are known for the features like :

- * **Reliability.**
- * **Timely execution.**
- * **Cost competitiveness.**

QUALITY ASSURANCE

The quality of our products and our eagerness for distinguishing is the main aspect of our success and existence. The quality is highly qualified and trained. The company provides them with all kind of knowledge related to the quality management. The quality department focuses on a very important aim that is to satisfy our customers and meet their expectations. We can achieve that through our commitment to the quality standards and assure the quality and the safety of our products before delivery. We believe the inspection of the raw materials by the most modern methods and instruments before the process is the main aspect to maintain the desired quality of our products.

What Is 3D Printing ?

3D printing is a technology that builds objects based on digital model files. Using bondable materials such as powdered metal or plastic, & printing them layer by layer.

The printed content comes from 3D models or other electronic data, and the printed 3D objects can have any shape and geometric characteristics.
